WORK EXPERIENCE

The Boldt Company

Nov 2011 — Current

Web Developer

Currently mastering IBM's XPages platform, with a great deal of SSJS and JSF, amongst other technologies involved. Primarily working on re-developing an in-house content management and documentation control system with a variety of modules and integration to other existing systems with both modern and legacy languages. Developing a modern, updated workflow with new actions and view entries, while preserving backwards functionality with the previous generation system. Server agents are a specialty, with run-time and user experience optimization a fact of life. Other projects and custom web apps developed in-house for other departments, as-needed. Legacy technology support while driving innovation and support of the company forward.

457th Transportation Battalion

Feb 2013 — Nov 2013

- On-Site Service Calls with personal and corporate customers
- System Restoration, Virus and Malware removal
- Component Upgrades
- Home and Office Networking
- Purchasing advise to the owner

EDUCATION

Management Information Systems - Business Administration

Sep 2002 — May 2007

Michigan Technological University

The Management Information Systems degree provides information that is needed to manage organizations efficiently and effectively. Management Information Systems are not only computer systems - these systems encompass three primary components: technology, people (individuals, groups, or organizations), and data/information for decision making. Management Information Systems are distinct from other Information Systems in that they are designed to be used to analyze and facilitate strategic and operational activities in the organization.

Emphasis in systems architecture and software development were added in all MIS electives, for a unique personal flavor. Served as team leader for senior capstone class project, culminating in a usability study and development of a departmental, mobile usability "lab" with documentation for continued use by others.

Emergency Medical Technician

Jul 2009 — Dec 2009

International Falls EMS

Successful completion of a 120 hour NREMT accredited course, successful pass of a written cognitive test and practical exam. Course includes a minimum clinical hours in emergency department and patient interactions in emergency, EMS setting, in "ride along" status. Critical thinking skills, memorization and practical application of medical information and practices, communication skills, and improvisation are all key to success.

Additionally certified with Minnesota's EMSRB (2009-current) and licensed in Wisconsin (2011-current).
